1-Day App Development Challenge Competition Rules

1 Event Overview

Participants will design and build a functional application within 8 hours. The goal is to transform an idea into a working prototype that solves a real-world problem or creates a meaningful user experience.

Teams will present their applications to judges at the end of the event.

2 Team Structure

- Teams can have **1–3 members**
- Participants may only belong to **one team**
- Teams must register before the event begins
- All development must occur during the event timeframe

3 Project Requirements

Each team must submit:

1. Working prototype or demo
2. GitHub repository
3. 3-minute demo presentation
4. Short project description including:
    a. Problem statement
    b. Solution
    c. Tools used (including AI tools)

4 Development Rules

4.1 Allowed

Participants are allowed to use:

- Any programming language
- Any framework or library
- APIs (public APIs encouraged)
- No-code / low-code tools
- AI tools / vibe coding (ChatGPT, Claude, Copilot, Cursor, etc.)

The goal is to build creatively, not restrict tools.

4.2 Not Allowed

- Using a fully pre-built project
- Using an existing startup / production app
- Submitting a project that was substantially built before the event
- Copying another team's project

Pre-built templates or boilerplates are allowed if **significantly modified.**

5 Important Note About AI (Vibe Coding)

AI-assisted development is **fully allowed and encouraged**.
However, teams will be evaluated on:

- the originality of the idea
- how effectively the tools are used
- the quality of the final product

Not just the amount of generated code.

6 Competition Tracks

6.1 Track 1 - AI & Automation

Apps that use AI to automate tasks or enhance productivity.

Examples:

- AI assistants
- Workflow automation
- Smart recommendations

6.2 Track 2 - Social Impact

Apps are designed to improve communities, education, accessibility, or sustainability.

Examples:

- Mental health tools
- Environmental apps
- Education tools

6.3 Track 3 - Fun & Creative Apps

Unique, entertaining, or experimental applications.

Examples:

- Games
- Creative tools
- Experimental interfaces

7 Presentation Format

Each team will have:

- 3 minutes demo
- 2 minutes Q&A with judges

Teams should explain:

- What problem they solved
- How their solution works
- Why their idea is innovative

8 Judging Rubric (100 Points)

8.1 Innovation & Creativity — 30 pts

How original and interesting is the idea?

- 26–30: Highly original idea with strong potential
- 20–25: Interesting but somewhat familiar concept
- 10–19: Basic or common idea
- 0–9: Very little innovation

8.2 Problem & Impact — 25 pts

Does the app solve a meaningful problem?

- 21–25: Clear, meaningful problem with strong real-world impact
- 15–20: Clear problem with moderate impact
- 8–14: Problem exists but solution is limited
- 0–7: Weak or unclear problem

8.3 Execution & Functionality — 20 pts

How well does the app work?

- 17–20: Fully functional, polished prototype
- 13–16: Mostly working with minor issues
- 7–12: Partial implementation
- 0–6: Mostly conceptual or non-functional

8.4 User Experience (UX/UI) — 15 pts

Is the app intuitive and pleasant to use?

- 13–15: Polished, intuitive design
- 9–12: Good usability
- 5–8: Basic UI with some friction
- 0–4: Difficult to use

8.5 Technical Implementation — 10 pts

How effectively were tools used?

Includes APIs, AI tools, and architecture decisions.

- 8–10: Strong technical execution
- 5–7: Moderate complexity
- 0–4: Minimal implementation

8.6 Bonus Points

Judges may award **up to +5 bonus points** for:

- Exceptional creativity
- Technical difficulty
- Unexpected innovation

8.7 Disqualification Conditions

Teams may be disqualified for:

- Plagiarism
- Using pre-built projects
- Harassment or disruptive behavior
- Violating event rules

9 Awards

- 🥇 Best Overall App
- 🤖 Best AI Application
- 🌍 Best Social Impact
- 🎨 Most Creative App
